VIDEO COPYMASTER

Automatic Video Enhancer and Duplicator

Model SED-CM

Instruction Manual

The Sima CopyMaster (Model SED-CM) will automatically enhance the quality of the home video you are duplicating.

This CopyMaster should be connected between your playback camcorder or VCR and the recording VCR as show in Figure 1. Only the video cables are to be connected to the CopyMaster. The audio cables should be connected directly between the playback and recording units. If you are using equipment with Hi-8 or S-VHS capability, connect your S-Video cables to the CopyMaster.

The CopyMaster can also give your home videos an old time look by eliminating the color and creating black and white video. Slide the switch from color to B/W to achieve this effect.

Note on AV Modes:

All VCR's have at least one AV mode, many have more than one. There will be a switch or button on the VCR that will toggle between the Tuner Mode and the AV Mode. VCR manufacturers call the AV Mode different names—External Mode, Auxiliary Mode or Line Input. These can be abbreviated to EXT., AUX. or L1, L2, etc. If in doubt, consult the VCR's user manual.

This CopyMaster Includes:

- 1 CopyMaster Unit (Model SED-CM)
- 1 300 ma 12V AC Adapter
- 2 Video Connection Cables
- 1 Instruction Manual

INFORMATION

This equipment generates and uses radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna;
- Relocate this equipment with respect to the receiver;
- Move this equipment away from the receiver;
- Plug this equipment into a different outlet so that this equipment and receiver are on different branch circuits.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communications Commission helpful: "How to Identify and Resolve Radio-TV Interference Problems." This booklet is available from the US Government Printing Office, Washington, DC 20402, Stock No. 004-000-00345-4.
